The design brings a special visual delight with the choice of natural beige colour and the pure, smooth and majestically delicate structure. With the use of traditional materials found in our daily practices, it has amazingly transformed into a very special "Skin" for construction, and left a lasting impression on the viewers. Eventually, it has given new life to the perception of "normality", and redefined the entire meaning. Through this, the booth design achieved a high degree of harmony in the cultural spirit of corporate branding.
